

AMENDMENTS TO CLAIMS

Agent for Applicant respectfully requests the following amendments to the claims without adding any new subject matter. Additions are shown in underlining, while deletions are shown in strikethrough or double square brackets.

Claims 1-29 (Cancelled).

30. (Currently amended) A member selected from the group of members consisting of a chair member, a bed member and a lounge member, said member having moving parts ₁ ~~[[and]]~~ a controller for said moving parts including information output circuitry ~~which outputs information from said member concerning directions for the operation of said controller for the moving parts~~ ₁ and an energy converter which converts energy to which the member is exposed to electrical energy for powering said information output circuitry₁ wherein said information output circuitry outputs information to a person occupying the member regarding the directions for the operation of the controller by the person ~~for the moving parts~~.

31. (Previously presented) A member as claimed in Claim 30 wherein said energy converter comprises a solar panel provided on an exposed surface of said member.

32. (Currently amended) A member as claimed in Claim ~~[[31]]~~ 30 wherein said information output circuitry is further linked to a biorhythm sensor.

33. (Previously presented) A member as claimed in Claim 32 including a digital display also powered by said energy converter and displaying information from said biorhythm sensor.

34. (Previously presented) A member as claimed in Claim 30 wherein said member comprises a chair and said energy converter converts motion of a moveable portion of the chair to electrical energy.

35. (Currently amended) A member selected from the group of members consisting of a chair member, a bed member and a lounge member, said member including an information output device which outputs information from said member, an energy converter which converts energy

to which the member is exposed to electrical energy for powering said information output device, wherein said information output device comprises a control for a moveable part of said [[chair]] member, said control outputting information to a person occupying the member regarding the directions of use of said control by the person without producing the movements of the [[chair]] member.

36. (Previously presented) A member as claimed in Claim 35 wherein said control provides audio feedback providing the directions for use of said control.

37. (Currently amended) A member as claimed in Claim 36 including a visual display also powered by said energy converter, said visual display visually displaying the directions for use ~~of the controls~~ said control.

38. (Previously presented) A member as claimed in Claim 30 including an electrical rechargeable power pack which is charged by said energy converter, said power pack storing the electrical energy and dispersing the electrical energy as required.

39. (Previously presented) A member as claimed in Claim 30 wherein said member comprises a chair having rolling casters for generating said electrical energy.

40. (Previously presented) A member as claimed in Claim 30 wherein said member comprises a chair and said chair has a back and seat and a moveable hinge between said back and seat for generating said electrical energy.

41. (Previously presented) A member as claimed in Claim 30 further having electrically operated body repositioning means powered by said energy converter, or rechargeable power pack.

42. (Previously presented) A member as claimed in Claim 41 wherein said member comprises a chair and said body repositioning means comprises a lumbar adjustment member, and said chair further includes an electrically generated timer which provides timed interval repositioning of said lumbar adjustment members.

43. (Cancelled).

44. (Currently amended) A chair as claimed in Claim [[43]] ~~38 further including wherein said electrical rechargeable power pack is~~ a rechargeable battery carried by said [[chair]] member ; ~~wherein and said generator energy converter recharges said rechargeable battery, said battery powering said electrical power requirements of said chair.~~

45. (Currently amended) A chair having electrical power requirements for displaying information to a person occupying the chair for the operation of controls by the person to move parts of the chair comprising:

- (a) energy converter means carried by said chair for:
 - (i) providing power to said controls to move the parts of the chair and to display said information to the person regarding directions for the operation of the controls by the person to move such parts of the chair; and
 - (ii) providing power to said display regarding the directions for operation of said controls by the person.

46. (Previously presented) A member as claimed in claim 30 wherein said information output circuitry outputs information regarding the directions for the operation of the controls for the moving parts without producing movement of the parts.

47. (Currently amended) A member selected from the group of members consisting of a chair member, a bed member, and a lounge member, said member including an information output device which outputs information from said member, an energy converter which converts energy to which the member is exposed to electrical energy for powering said output device, wherein said information output device comprises a control for a moveable part of said member, said control output device outputting information to a person occupying the member regarding directions of use of said control by the person without producing the movement of the moveable part.
